Grade Level: 3&4

Subject: Art

Brief Description of Activity:

Students will use technology to research their selected artwork and artist, organize information found in files and create a presentation for the class using presentation software, ie PowerPoint.

General Learner Outcome:

A Cultural Experience: an appreciation for artistic accomplishments, past and present.

Specific Learner Outcome:

APPRECIATION: Students will interpret artworks by examining their context and less visible characteristics.

- A. Contextual information (geographical, historical, biographical, cultural) may be needed to understand works of art.
- B. Artistic style is largely the product of an age.
- C. Technological change affects types of art.
- D. Our associations influence the way we experience a work of art. E. Art is valued for different reasons; e.g., aesthetic, economic, symbolic, associative. F. Art serves societal as well as personal needs.

ICT Outcomes:

- P.3.2.1 create a multimedia presentation, incorporating such features as visual images (clip art, video clips), sounds (live recordings, sound clips) and animated images, appropriate to a variety of audiences and purposes
- P.3.2.2 access available databases for images to support communication
- P.5.2.2 navigate through a document that contains links to locate, copy and then paste data in a new file

Rationale for Computer Integration:

Access to view master and modern artists work will enhance student appreciation for the technical, aesthetic and compositional aspects of art. Compiling information and organizing it into a presentation via technology, will allow students to become masters. Utilizing technology will build 21st Century Skills.
